Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 13-18 and

20-30 are allowed over the closest reference, U.S. 2002/0128339 to Maisonnier et al.

The present invention is drawn to a process of obtaining a photochromic lates

comprising: preparing a mixture comprised of at least one organic monomer, at least one organic

photochromic compound, at least one surfactant, and water, forming a miniemulsion of the

mixture such that the dispersed droplets of organic phase have a diameter of 50-500 nm, adding

a polymerization primer to the mixture before, during, or after forming the miniemulsion,

polymerizing the reaction mixture and recovering the latex.

Maisonnier et al. discloses a method of preparing a photochromic latex comprising

preparing an aqueous emulsion of at least one monomer Z and at least one photochromic

chromene compound and polymerizing in the presence of water soluble initiator (i.e.,

polymerization primer) to obtain the photochromic latex. There is no teaching of preparing a

miniemulsion of the monomer mixture prior to polymerization.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."
